Editor's Comment

Divertimento III, KV 439b, is found in W. A. Mozart: *Neue Ausgabe sämtlicher Werke*, with the information that it was composed sometime between 1783 and 1788. It is the second of five such pieces scored for three basset horns. The ranges of basset horn and viola are similar, and the two instruments, seem to share a popular 21st century identity, both being devoutly middle-range, somewhat covered in timbre, not slow, but primarily not devoted to virtuosity, useful for blending or fitting-in, supplying richness and pleasing, colorful texture. Perhaps the similar personalities of players drawn to these instruments is enough to justify the little adjustment necessary to make this music available to violists, enriching their repertory, and providing a wider reception than would be found in the basset horn community.

Mozart wrote more than a smattering of music for the basset horn, at a time when the identity of the instrument was not yet well established. These five works, which are a significant effort in this medium, stand out in the literature as trios for three identical instruments. This is clearly "commercial" Mozart . . . garden-party or social background music. It is not serious in execution or presentation, but even the flossiest Mozart has wit, charm, and beauty in abundance.
